

Textile dyeing with plants from Anna's Tuin

Information

Discover the hidden colors of the garden!

Throughout thousands of years, people have obtained color out of plants to dye their yarns and fabrics. In this workshop, you learn some basic techniques of how you can obtain colors from local plants. We'll dye with several plants and experiment with printing and drawing techniques using materials from the garden and natural inks.

You'll leave with a self-designed handkerchief and enough basic knowledge on dyeing so you can start experimenting at home.

Date

Saturday September 4th

14.00 – 17.00 hrs
